

## Traqc-5 P700 Hydraulic handpump

- ✓ **Maximum pressure 700/1000bar**
- ✓ **Fine pressure adjustment**
- ✓ **Easy Maintenance**
- ✓ **Pressure media: oil, water**
- ✓ **Flexible and reliable calibration set**

The easily operated hydraulic test pump is specifically designed for the medium to high pressure range.

The pump has a built-in reservoir for the hydraulic fluid. Pressure up to 700 and 1000 bar can be accurately generated.

The simple, easy maintenance design of the Model Traqc-5 P700/1000 Hydraulic handpump will give years of trouble free service. Together with a case, hoses, adaptors, and a Traqc-1 DPG Series high accurate digital manometer this is an effective aid to perform the necessary test and calibration tasks quickly.

Tradinco Instruments distributes, designs, manufactures and repairs calibration, sensing equipment and instruments for various industries.

Our core values are quality, service and keeping our knowledge up to date with the latest technical innovations.

## Technical Specifications

**Pressure media:**

Distilled water or Hydraulic fluid

**Pressure range:**

Traqc-5 P700; 0...700 bar

Traqc-5 P1000; 0...1000 bar

**Dimensions :**

Approx. 255x225x85 mm

**Weight :**

Approx 1.7 kg

**Test connection:**

Reference : G ¼

Test sample : G ¼ with quick coupling and 1 meter High pressure hose

**Supply for full version includes :**

- ✓ Case
- ✓ 1 meter pressure hose
- ✓ Stainless steel Adapter kit
- ✓ PA Seals and O-rings

**Dimensions :**

Approx. 450x370x125 mm

**Weight :**

Approx 4.8 kg

**Ordering codes:**

Traqc-5 P700/1000 , Traqc-5 Hand pump 0 to 700 bar , 0 to 1000 bar

Traqc-5 P700/1000 Kit, Traqc-5 Hand pump 0 to 1000 bar including case, hose and adapters

Traqc-1 Digital manometer Refer to Data sheet : Traqc-1 DPG Series
